KABOOTI®

SCULPTED SURFACE
Comfortably fits your bottom's shape.

GENEROUS COCCYX CUTOUT
Eliminates direct contact between you and the chair to relieve tailbone pressure during prolonged seating.

ERGONOMIC WEDGE DESIGN
Encourages proper posture.

MALE/FEMALE RECESS
Provides genital contact relief.

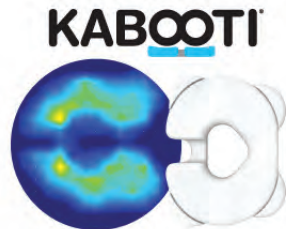

MACHINE-WASHABLE, STRETCH-KNIT COVER with carry handle
Allows for discreet use anywhere.

LARGE CENTER OPENING
Unique center opening removes pressure and connects to the coccyx cutout for cooling airflow.

INNOVATIVE STABILITY LOBES
Evenly distributes weight to provide greater stability and prevents tipping.

TAPERED FRONT EDGE
Reduces pressure points under thighs and allows legs to fit underneath desks, tables, and vehicle steering wheels.

The **KABOOTI®** is uniquely engineered to be superior to conventional donut cushions.

Pressure mapping* shows a comfortable seating with minimal pressure on the Kabooti, but the donut cushion shows extremely high pressure concentration (red and orange areas) on buttocks area. This can result in uncomfortable seating, reduced skin and surface blood circulation and potential damage to skin.

*Pressure maps performed with 175 lb. male, using XSensor pressure mapping equipment & software.

Ordinary Donut Cushion

KABOOTI[®]

The KABOOTI ICE distributes your body's weight evenly - without high concentrations of pressure on sensitive areas - especially in the central and tailbone/coccyx area.

Makes the Ordinary Donut Obsolete!

Pressure mapping* shows soothing comfort with the Kabooti Ice, but the donut cushion shows extremely high pressure concentration (red and orange areas) on buttocks area. This can result in uncomfortable seating, reduced skin and surface blood circulation and potential damage to skin.

*Pressure maps performed with 175 lb. male, using XSensor pressure mapping equipment & software.
